Privacy Policy

Unavailable for Comment Bot. Updated: 17/04/2021.

1) **What data is collected?**
   To provide our users with the optimum functionality, we only collect the data that we need to function. For example, the default ranking system setup counts how long you've spent online, in vc, and number of messages. You will always be able to see the collected data through use of the features on the bot; no data is collected that is not visible to the viewer.

2) **How to delete and request deletion**
   If there isn't a well-documented way to delete your data, you can reach out to our admin team on our support server, to get the data deleted for you.
   For some features, the bot will automatically remove the data once the feature is no longer being used, or has been disabled.

3) **How to contact us**
   Reach out to us on our support server to contact us. To join, run *~supportserver* and click the invite link.
